Emerald CX[®]

Kevlar[®]/Wire-Core Cut-Resistant Gloves

#SCXNT

Emerald CX[®] is an engineered blend of super-strong materials, combining some of the strongest fibers known to man. They provide exceptional cut resistance, reaching an impressive ANSI level A6, compared with a standard-weight Kevlar[®] glove which scores an ANSI Level A2. But their cut resistance is not the best thing about these gloves; the best thing is that they don't feel like you could possibly be wearing a quarter mile of steel on your hands. The nitrile palm coating provides a good grip with a comfortable fit.

In addition to stellar cut resistance, high abrasion resistance and exceptional comfort, Emerald CX[®] is where value meets performance; you'd expect to pay a lot more for a glove with such impressive stats.

Test them in your own demanding applications.

Kevlar[®] is a registered trademark of E.I. du Pont de Nemours and Company.

3321 grams of cut protection.

FEATURES

- Blend of Kevlar[®], wire-core steel and polyester for increased cut protection
- With over a quarter-mile of steel in each glove, the cut and abrasion resistance is twice that of a regular Kevlar[®] glove
- Nitrile palm coating for better grip
- High abrasion resistance with great comfort and dexterity

APPLICATIONS

Metal Fabrication
Assembly
Glass Handling
Sheet Metal Work

AVAILABLE SIZES
